

We treat your home like ours!

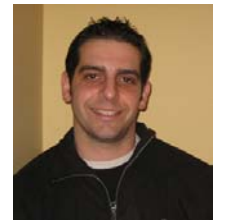

Summer Edition 2008

Greetings From Vince and Anthony...

Welcome to the Summer Edition of the "Renovation Report". We would like to thank everyone for the overwhelming positive response to our winter edition. Your comments were helpful and much appreciated. Much has happened for us at GGC, and we are excited to present our Summer Edition topic **Easy Kitchen Makeovers**.

Sometimes less is more, and we can show you how a new countertop and tile backsplash can totally transform your kitchen from mundane to fabulous. As always, our goal is to provide an excellent renovation experience. As reliable renovators, we believe in quality service, exceptional workmanship and forming strong relationships with our clients.

We want to assist you with your future renovation decisions. Please feel free to contact us with comments, questions or for a free estimate.

We've updated our website. Check it out at <http://www.ggcinc.ca>

Easy Kitchen Makeovers

When called to renovate our client's kitchen, she was adamant about one thing; she loved her cabinets and did not want to replace them. Keeping the existing kitchen cabinets would work in this situation and together with the client, we formulated a plan to rebuild and modify only what was necessary.

New floor tiles, granite countertops, an under-mounted sink, new faucet and tumbled marble [backsplash](#) complimented the existing cabinetry.

The old microwave location was transformed into an oak shelving unit. Over the oven, a new [microwave with combined ventilation hood](#) was installed as a great space saver.

Our client was ecstatic about her kitchen's new look.

Back Splash Update – Glass Tile is All The Rage

A designer we frequently work with approached us to install a 1 inch x 1 inch glass tile backsplash.

The impact of this tile design, especially when you first walk into the kitchen, is truly amazing. This backsplash becomes more than just tiles on the wall, but rather an interesting and artistic focal point, which the client was thrilled with.

Visit the [website](#) to view more backsplash pictures.

Tips – Transforming Your Kitchen, The GGC Way

- ❖ Installing a new backsplash? Consider adding additional electrical outlets and counter valance lighting.
- ❖ Looking for space? Replace your oven hood fan with a new microwave with combined ventilation hood.
- ❖ When replacing your countertop, save space by using an under-mounted sink. Granite is a great countertop option.
